A TRADITION OF CELEBRATING OUR COMMUNITY OF LEARNERS

PHOTOGRAPHY FROM 2018 STUDENT SYMPOSIUM BY KIM LEE SCHMIDT
Dear Friends:

Welcome to the School of Arts & Sciences’ Student Symposium at the University of Richmond. We are thrilled to be celebrating the 34th year of this wonderful event, an occasion that highlights the dedication of our diverse community of learners, especially our students and their faculty mentors.

Last year, 266 Arts & Sciences students participated in a summer research experience with funding from UR Summer Fellowships, Arts & Sciences, or an external funding source. Many students continued their research pursuits during the academic year, or extended a project into a second or third academic endeavor. Several student researchers co-authored peer-reviewed journal articles with their faculty mentors, and others presented their work publicly at conferences, on stage, or in a gallery exhibit. Today, over 300 students share their research with friends, family, faculty, and peers in the form of posters, exhibits, performances, and oral presentations.

This year’s Symposium includes such varied presentations as “The Effects of Health Literacy on Patients Health Optimism and Treatment Adherence;” “Race, Space, and Coal Waste: A Critical Environmental Justice Analysis of Central Appalachia’s Prison Industry;” “Reconceptualizing the International Humanitarian Organization- IOM and UNHCR at Europe’s External Borders;” and others within our annual theme, Contested Spaces, such as, “Contesting Voices: The Issue of Incorporating Outside Sources into an Argument.”

With student presenters in disciplines across the arts, languages, cultures, humanities, social sciences, natural sciences, and applied sciences, the Student Symposium reflects the breadth and depth of the curriculum in the School of Arts & Sciences, the heart of the University of Richmond’s liberal arts enterprise. We are committed to supporting the professional and psychosocial development of our students by providing them opportunities to pursue projects which further reflection, creativity, and the production of knowledge. Our students do this work alongside esteemed faculty.

Thank you for being here today to celebrate our students and their scholarship.

Yours truly,

Patrice Rankine, Professor of Classics
Dean, School of Arts and Sciences
Quilts have long served as icons of American domesticity that embody familial and social connections while allowing for freedom of expression and individuality. With their patterns both archetypal and personal, quilts richly represent the times in which they were made and the people who create them.

I designed this dress with an antebellum-style bottom and an Asian-style top to reflect my Asian-American heritage, melding old and new scraps, piecing history alongside the present. The un-apologetically vibrant visible exterior concealed the vulnerable interior; the same dress reversed completely into black to represent the quiet and the shy. To me, this balance represented in the fabric by its tactile familiar quality may have been lost in any other art form.” —EMMA FELT, VMAP ‘17

Though we have an expansive and diverse list of expertise, experiences, and learning opportunities we pride ourselves on being a tight-knit community of lifelong learners bound together by one common mission. Our A&S community—made up of students, faculty, alumni, and staff—questions the unknown, seeks answers, and thrives by learning how to turn new-found knowledge into action. From art history to physics, Arts & Sciences prepares students to be committed lifelong learners who challenge societal and intellectual barriers, who provide ethical leadership, and who lead sustainable and meaningful lives.

Every Richmond student begins their undergraduate career in Arts & Sciences, placing us at the heart of Richmond’s liberal arts experience. We implement a broad-based, integrative educational approach while valuing the power of an inclusive community where faculty, students, alumni, and staff all inquire, discover, and take risks together.

Together, we’re fostering intellectually nimble global leaders capable of critical thinking and adaption in a diverse and ever-changing world.
